LAMENTABLE TENTACLES: RULES

FISH

Shuffle all new Fish in with all Fish from the base game of the correct depth. When setting up the game, deal out only 13 fish to each shoal, returning any remainders to the box. If you want to ensure *all* expansion Fish are included in the game, randomly discard 6 Fish of each depth from the base game *before* shuffling in the new expansion Fish. Gameplay proceeds as normal.

To remove the expansion from the game, find all cards with a tentacle in the bottom left corner.

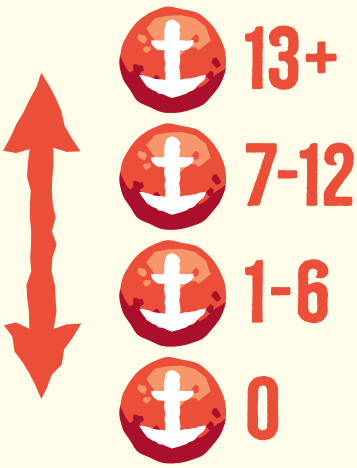

BIGGEST REGRETS

Deal a random Biggest Regret card to each player at the start of the game. Players tuck this card under the the lower-left corner of their angler board so that only the 0 ability is visible.

At the start of each day, players adjust their Biggest Regret card's visibility based on how many Regret cards they have.

Once a day, on their turn, a player can use the topmost visible ability on their Biggest Regret card. This is not an action.
