

Onitama

Forgotten Moves

This is a fan expansion for Onitama. It is compatible with any other expansion. You need the original Onitama game in order to play.

Components

14 Move Cards. 2 of them (Whale and Owl) require the *Way of the Wind* expansion.

Dual Cards on the Wind Spirit

Dual cards are cards that move the master or the students differently. Such cards include the Mejika, Okija, Sasori or Kumo. This expansion also includes two new Dual Cards (Koala and Koi). You may use these cards in a Wind Spirit game, using the *Way of the Wind* expansion. When using such a card on the Wind Spirit itself, the Wind Spirit will move following the student moves of that card. Master moves are only possible for the Masters themselves.

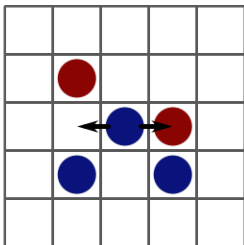

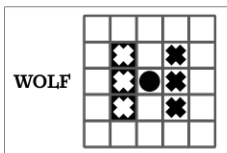

New moves

This expansion includes cards with new kinds of moves, that can only be done under certain conditions.

Some moves (a white cross on a black square) are only possible when the pawn is moving to an empty square.

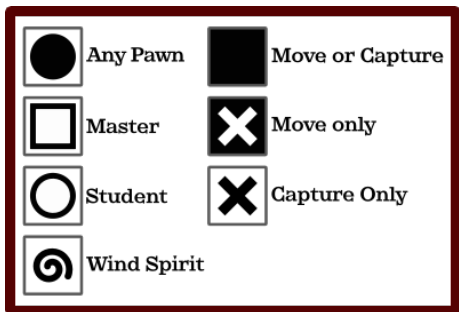

Some others (a black cross on a white square) are only possible when the pawn is moving on an opponent pawn (student or master).

In the following example, the pawn in the middle of the board can either move to its left or capture the pawn on its right using the Wolf Card. No other move is possible for that card and that pawn.

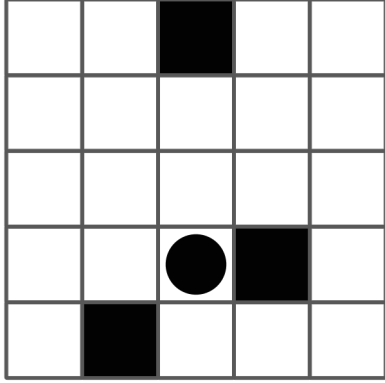

Draft

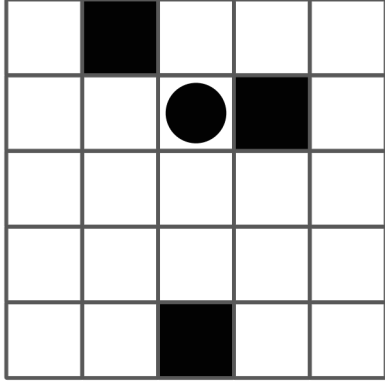

Draft is a new way to set up the game. To start a new game, draw 5 cards. Select a first player randomly or using the stamp of the last drawn card. The players then take turns picking a card from these 5 cards, starting from the second player. The last card to be picked is the extra card in the middle. Note that when playing with Spirit Cards, the two players can start the game with a different number of Spirit Cards.

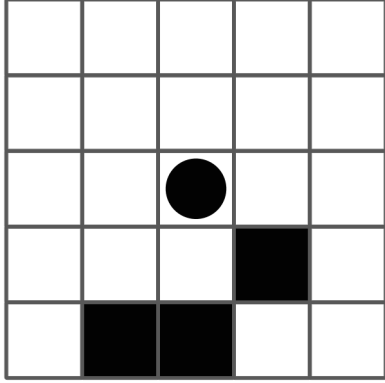

S'TORK

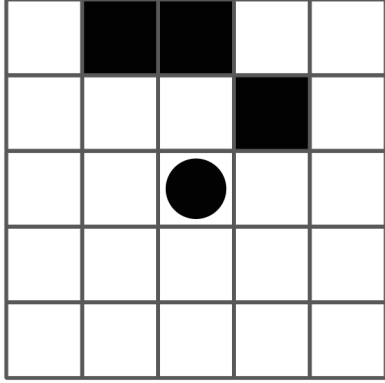

FLAMINGO

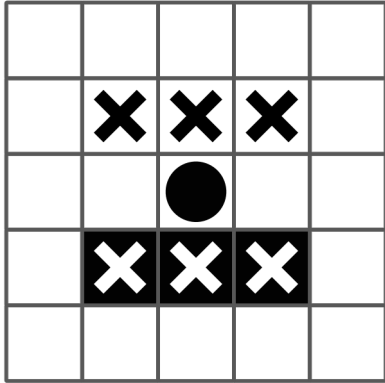

PEACOCK

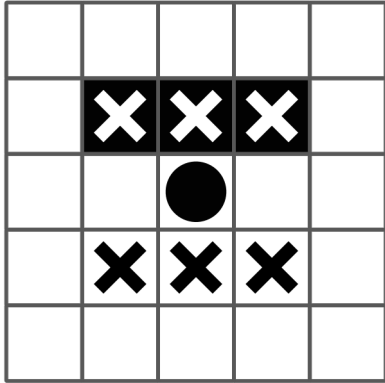

PHEASANT

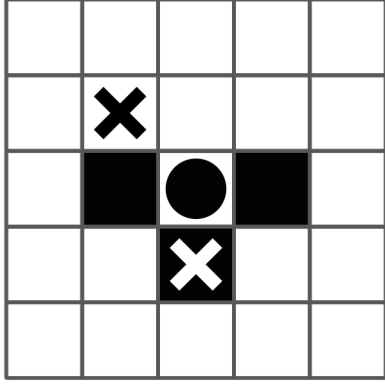

WOLF
